

# Soundboard Dust Remover

## To use:

- Insert wedges and treble duster between gaps in strings, and drag along soundboard to pick up dust.
- Use a vacuum attachment to remove dust from tool with each pass.
- The tools are made of spring steel and will flex, making it easy to cover more area. Do not use excessive force to intentionally bend the tools beyond their normal range of flexibility.
- Use only to dust: Never apply fluids or chemicals directly to the 100% wool felt.
- If the soundboard requires fluids for cleaning, this should only be done by a qualified piano technician because permanent damage can result if fluids contact the strings. Piano technicians: If using fluids, wrap the felt surfaces with plastic wrap and use the tools to push a dampened cloth across the soundboard surface.

This tool set is warranted against defects for 2 years from the time of purchase. If you ever have an issue, please visit [supply88.com](http://supply88.com) and contact us directly. Thank you for purchasing the Soundboard Dust Remover!
